This Kaycha Labs Certificate of Analysis (COA) is not to be reprinted, used in its entirety, without written approval from Kaycha Labs. The results shown on this COA are for the specific product analyzed. ND=Not Detected, Upper Particulate Matter (UPM) are not used to describe the physical concentration that can be detected and verified associated by an analytical process. Accuracy, better than 1%, and State Laboratory Reference Board (SLRB) Rule 64D20-06.002 5, Rule 64D-20-06.002 5. The measurement of accuracy (MA) will be available from the lab upon request. The "Detection Limit" for results does not include the ND. Any reanalysis results may include rounding errors.

This Kaycha Labs Certification shall not be reproduced, copied or its contents, without written approval from Kaycha Labs. The results shall apply only to the product or products analyzed. In-house Detection, Upper Limit Per Weight (ppm-Parts Per Billion), PSC-Relative Standard Deviation, Limit of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the smallest concentration that can be detected and reliably measured by an analytical procedure, respectively. A few Levels are shown with in-house procedures based on P.S. Name GAD/2022 and P.S. Test 58-6. The Measurement of Accuracy (MA) error is available from the lab upon request. The "Detection Rule" for pass/fail does not include the MA. Any observed failure may include rounding errors.

This report is valid only if the material is analyzed and the results are reported by Kaycha Labs. The results are only for the material analyzed. ND= Not Detected. ppm= Parts Per Million. mg/patch= mg per 0.2537g (relative standard deviation: 1.00%). LOD= Limit of Detection (LOD) and LOQ= Limit of Quantification (LOQ) are terms used to describe the smallest concentration that can be detected and reliably measured by an analytical procedure, respectively. Actual values are always determined two-fold based on 7.5. Rule 64B(2)(b) and 7.5. Rule 64B(2)(c). The measurement of uncertainty (MU) value is available from the lab upon request. The "Detection Risk" or "Pass/Fail" does not include the MU. Any calculated result may include rounding errors.

This Kaycha Labs Certificate shall not be reproduced, stored in a retrieval system or otherwise used without written approval from Kaycha Labs. The results pertain only to the material or product analyzed. Methods described herein are for information only. Relative Standard Deviation, Limit of Detection (LOD) and Limit of Quantitation (LOQ) are terms used to describe the lowest concentration that can be detected and reliably measured by an analytical procedure. In particular, Action Levels are statistically determined (typically based on F.S. Rule 54D02.01 and F.S. Rule 54D.4. The Measurement of Uncertainty (MU) error is available from the lab upon request. The "Pass/Fail" for passed samples is only the MU. Any calculation from a test result contains rounding errors.
